### LPSD Parents, We Need Your Help!

***\*\*If your child is sick, whether due to COVID or otherwise,  
please keep them home\*\****

- Screen your child for symptoms at home each morning prior to putting them on the bus or sending them to school.
- Keep communication lines open with the school, immediately letting your principal or head teacher know if your child is sick, showing symptoms or has tested positive for Covid-19 (or anyone in your family for that matter)
- Follow the guidelines on the second page of this document if your child tests positive for COVID
- Encourage your child to understand and comply with newly imposed safety mandates
- Practice good sanitation and hand washing habits at home
- Adhere to your communities' travel protocols upon return from out-of-region travel
- Communicate questions and concerns with your head teacher or principal. Please don't let anything fester...

### CDC Guidance for COVID-19 Prevention in K-12 Schools

**If you test positive** for COVID-19, stay home for at least 5 days and isolate from others in your home. You are likely most infectious during these first 5 days.

- **Wear a high-quality mask** if you must be around others at home and in public.
- Do not go places where you are unable to wear a mask.
- Do not travel.
- Stay home and separate from others as much as possible.
- Use a separate bathroom, if possible.
- Take steps to **improve ventilation** at home, if possible.
- Don't share personal household items, like cups, towels, and utensils.
- Monitor your **symptoms**. If you have an **emergency warning sign** (like trouble breathing), seek emergency medical care immediately.
- Learn more about **what to do if you have COVID-19**.

When you <b>test positive</b> for COVID-19, isolation is counted in days, as follows	
If you had no <b><u>symptoms</u></b> <ul style="list-style-type: none"><li>• <b>Day 0 is the day you were tested</b> (not the day you received your positive test result)</li><li>• <b>Day 1 is the first full day</b> following the day you were tested</li><li>• If you develop symptoms within 10 days of when you were tested, the <b>clock restarts at day 0 on the day of symptom onset</b></li></ul>	If you had <b><u>symptoms</u></b> <ul style="list-style-type: none"><li>• <b>Day 0 of isolation is the day of symptom onset</b>, regardless of when you tested positive</li><li>• <b>Day 1 is the first full day</b> after the day your symptoms started</li></ul>

### Ending Isolation

- End isolation based on how serious your COVID-19 symptoms were. Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation.
- If you **had no symptoms**, you may end isolation after day 5, while continuing to wear a mask at school through day 10.
- If you **had symptoms and your symptoms are improving**, you may end isolation after day 5 if you are fever-free for 24 hours (without the use of fever-reducing medication), while continuing to wear a mask at school through day 10.
- If your **symptoms are not improving by day 5**, you need to continue to isolate until you are fever-free for 24 hours (without the use of fever-reducing medication), and your symptoms improve.
- If you had **symptoms and had moderate illness** (you experienced shortness of breath or had difficulty breathing), you need to isolate through day 10.
- Severe illness (you were hospitalized) or have a weakened immune system, you need to isolate through day 10. Consult your healthcare provider before ending isolation.
